

# List of Presentations

	Page
<b>I. CO<sub>2</sub> Emissions by Energy Use: Present Situation &amp; Measures for Reduction</b>	
Luiz Pinguelli Rosa, Rafael Schechtman, Marco Aurélio dos Santos, Suzana Kahn, Federal University of Rio de Janeiro, Brazil <i>Carbon Dioxide Emissions from the Brazilian Energy System and Clean Energy</i>	1
Emilio Lebre La Rovere, Federal University of Rio de Janeiro, Brazil <i>Sustainable Energy and Climate Change</i>	5
Rui Antonio Alves da Fonseca, PETROBRAS, Rio de Janeiro, Brazil <i>Petrobras – Business and Environment</i>	7
Fernando Peregrino, FAPERJ, Rio de Janeiro, Brazil <i>RIO 02 - The Rio Clean Development</i>	15
Mauricio T. Tolmasquim, Federal University of Rio de Janeiro, Brazil <i>The Brazilian Energy Matrix and Greenhouse Gas Emissions</i>	21
Loftur R. Gissurarson, Thorlakur Björnsson, Reykjavik Energy, Iceland <i>Implementation of green bookkeeping at Reykjavik Energy</i>	31
Giovani Vitória Machado, Roberto Schaeffer, Federal University of Rio de Janeiro, Brazil <i>Energy Embodied in International Trade: The Case of Brazil</i>	41
Rolf Hanitsch, Technical University Berlin, Germany <i>Energy Efficient Electrical Motors</i>	45
<b>II. Solar Energy Conversion</b>	
Adolf Goetzberger, Fraunhofer Institute of Solar Energy (ISE), Germany <i>Applied solar energy</i>	51
Peter T. Landsberg, University of Southampton, United Kingdom <i>Theoretical limits of photovoltaic solar energy conversion</i>	61
Christopher R. Wronski, J. M. Pearce, R. J. Koval, A. S. Ferlauto, and R. W. Collins, Pennsylvania State University, USA <i>Progress in Amorphous Silicon Based Solar Cell Technology</i>	67

Thomas Hamlin, United Nations Environmental Programme, Nairobi, Kenya <i>Solar and Wind Energy Resource Assessment (SWERA)</i>	73
Marco A. Galdino, Jorge Lima <i>PRODEEM - The Brazilian Programme for Rural Electrification using Photovoltaics</i>	77
Maria Eugênia Vieira Silva, Alex Sandro de Araújo, Marcelo Ricardo Queiroz Medeiros, Federal University of Ceará, Fortaleza, Brazil <i>Adjustment of the Clear Sky Coefficients for the Solar Radiation under the Ambient Conditions in Fortaleza</i>	85
Maria Eugênia Vieira Silva, Marcelo Ricardo Queiroz Medeiros, Federal University of Ceará, Fortaleza, Brazil; Klemens Schwarzer, Research Center Jülich, Germany <i>Experimental Results of a Solar Cooker with heat storage</i>	89
Jörg-Dieter Anhalt, Institute for Sustainable Development and Renewable Energies, Fortaleza, Brazil <i>The Solar Home System and its Adequate Design to Serve the End User (How should a SHS look like? - A comparison in practice)</i>	95
Stefan Krauter, Fabian Ochs, Federal University of Rio de Janeiro, Brazil <i>An All-in-One Solar Home System</i>	101
Stefan Krauter, Thomas Depping, Federal University of Rio de Janeiro, Brazil <i>Satellite Monitoring of Remote PV-systems</i>	109
Carsten Hafermann, Solon AG, Berlin, Germany <i>Innovative German Approaches in BIPV</i>	115
 <b>III. Hydro &amp; Wind Energy</b>	
Luiz Pinguelli Rosa, Marco Aurélio dos Santos, Bohdan Matvienko, Elizabeth Sikar, Federal University of Rio de Janeiro, Brazil <i>Hydroelectric Reservoirs and Global Warming</i>	123
Ulrike Wachsmann, Mauricio T. Tolmasquin, Federal University of Rio de Janeiro, Brazil <i>Windpower in Brazil - A Transition using the German Experience</i>	131
Ciro Ruiz, Wobben Windpower, São Paulo, Brazil <i>Wind Energy in Brazil</i>	137

## IV. Architecture and Urbanism

- Peter Kosak, Martin Becker, University of Kaiserslautern, Germany  
*System Theoretical Analysis of Decentralized Energy Systems for Residential Buildings* 145
- Manfred Köhler, University of Applied Sciences Neubrandenburg; Marco Schmidt, Technical University Berlin, Germany; Michael Laar, University of Applied Science Cologne, Germany; Stefan Krauter, Ulrike Wachsmann, Federal University of Rio de Janeiro, Brazil  
*Photovoltaic Panels on Greened Roofs - Positive interaction between two elements of sustainable architecture* 151
- Michael Laar, Friederich Grimme, Institute of Technology in the Tropics, University of Applied Science Cologne, Germany  
*Sustainable buildings in the tropics* 159
- John W. Spears, International Center for Sustainable Development, Gaithersburg, USA; Larry Hill, East West Center, Honolulu, USA  
*Design of a Model Sustainable Village: Guanghan, Sichuan Province, China* 164
- Suzana Gueiros Teixeira, Federal University of Rio de Janeiro, Brazil  
*Urban Strategies and Product Design Improvements* 175

## V. Sustainable Development

- Jörg Dieter Anhalt, Institute for Sustainable Development and Renewable Energies, Fortaleza, Brazil  
*Sustainable Implementation of Solar Home Systems in Rural Areas in the Northeast of Brazil* 183
- Dirk Wolters, Wuppertal Institute, Wuppertal, Germany  
*Regional strategies for energy innovation, climate protection and job creation* 191
- Cintia Mara Miranda Dias, Federal University of Rio de Janeiro, Catholic University of Rio de Janeiro, Brazil  
*Sustainable Development: The Anthropocentric Epistemology* 201
- Alexandra Lichtenberg, Consultant on Sustainable Architecture, Rio de Janeiro, Brazil  
*The Next Revolution - Feasible Sustainable Development* 207

## VI. Transport & Mobility

- Márcio R.A. Schettino, Metropolitan Company of Urban Transport of São Paulo, Brazil  
[\*Environmental strategy for energy: hydrogen fuel cell bus for Brazil\*](#) 217
- Francisco E. Mendes, Lilia Szwarcfiter, Cláudia do Valle Costa, Federal University of Rio de Janeiro, Brazil  
[\*Car fleet renewal: CO<sub>2</sub> emissions and ancillary benefits\*](#) 225
- João Eudes Touma, Gerente Executivo da Unidade de Conservação de Energia, Energia Renovável e Suporte, CONPET, PETROBRAS  
[\*Economizar: A Fuel Stewardship Project\*](#) 235

## VII. Social and Political Implications

- Olav Hohmeyer, University of Flensburg, Germany  
[\*The Social Costs of Energy Consumption\*](#) 243
- Dirk Wolters, Wuppertal Institute, Germany  
[\*The contribution of renewable energy sources and rational use of energy to economic development\*](#) 257
- Klaus Knecht, Carl Duisberg Gesellschaft, Berlin, Germany  
[\*Education for Renewable Energies and Climate Change\*](#) 265
- Gunnar Boye Oelson, Michel Kvetny, Emilio Lebre La Rovere, International Network for Sustainable Energy INFORSE  
[\*Sustainable Energy Vision 2050 - a proposal to achieve a sustainable energy system, following our environmental and social imperatives\*](#) 269
- Adelino Ricardo Jacintho Esparta, Auad Atala Jr., Carlos de Mathias Martins Jr., Ecoinvest Assessoria Ltda., São Paulo, Brazil  
[\*Brazilian Greenhouse Gases emission baselines from electricity generation\*](#) 275

## VIII. Examples for Financing

- Gilberto Velazquez, Autonomous University of the City of Juárez, Mexico.  
[\*Emission trading opportunities in an international airshed.\*](#) 281
- Irving Mintzer, University of Maryland, USA  
[\*Capacity Building: Opportunities and Challenges for CDM in Brazil\*](#) 285

Simon Worthington, BP Solar, Rio de Janeiro, Brazil <i>Creative Partnerships for Sustainable Energy Projects in Brazil</i>	287
---	-----

## **IX. Planning Tools**

Michael Stavy, Consultancy, Chicago, USA <i>Computing the Cost (\$/kWh) of Solar Generated Electricity at Grid connected Photovoltaic (PV) Generating Plants</i>	293
---	-----

Giorgio Beccali, Maurizio Cellura, Mariana Mistretta, Energy Department, University of Palermo, Italy <i>A Decision Support System Software based on multi-criteria Analysis for the Selection of Urban Sustainability Scenarios</i>	301
---	-----

## **X. Annex**

<i>The Declaration of RIO 02</i>	309
<i>Brazil's New Energy Law</i>	313
<i>Author Index</i>	325
<i>Photos of RIO 02</i>	326
<i>Reminder</i>	328
